

rediCloud

Make cloud services simple, practical, and affordable

Our Cloud. Your Business. Done Right.

rediCloud, is ATSG's enterprise-grade Cloud Service which provides the performance, flexibility, affordability and security for organizations of all sizes. Our team of technical specialists and business professionals are committed to driving innovation through the use of cloud technology. ATSG works with our clients to develop strategies around transitioning to the cloud and increasing your business agility. In partnership with leading technology vendors, ATSG ensures value and innovation to your cloud solutions, from dedicated private, to shared, hybrid and public cloud offerings. ATSG enables you to plan, migrate, operate and optimize your Multicloud experience.

Secure Performance You Can Count On

Built on industry-leading, best-of-breed infrastructure, our comprehensive cloud solutions enable firms to improve their competitive advantage. Clients can accelerate critical initiatives, extend capabilities, simplify operations, and gain business agility without a costly price tag. In addition, companies can rely on 99.999% uptime and high performance for critical applications. rediCloud exceeds expectations by delivering excellent service with a no-excuses attitude and a commitment to client success. With rediCloud's world-class enterprise infrastructure supporting your critical operations, you gain the power and flexibility that once was exclusive to large organizations. Now, you can get enterprise capabilities and put that advantage to work for results that matter.

Through ATSG's rediCompute, rediBackup, rediDesk, rediStore, rediRecovery and rediHost solutions you are provided with a reliable, affordable cloud computing service that has been held to the highest of standards. ATSG has undergone a rigorous certification process, including a third-party audit of our capabilities to ensure we can meet our client's expectations regardless of complexity, while maintaining Cisco's best practices and conforming to the ITIL framework.
